

Mithilessh Bhasker.

Student developer focused on robotics, open-source tools, and hands-on hardware. I like building real systems, testing them, and improving them until they work reliably.

01 Experience

ROBO RACERS · FTC TEAM 16481ROBOTICS

Software Lead

Lead autonomous software for an FTC competition robot and turn match strategy into working field routines.

- Write and tune autonomous routes around scoring positions, timing, obstacles, and robot orientation.
- Use pose, heading, localization, and telemetry to track down problems during field testing.
- Adjust software as match strategy and robot hardware change throughout the season.

PEDRO PATHING · OPEN SOURCE12 MERGED PRS

Contributor + Beta Tester

Contribute to the Pedro Pathing Quickstart and documentation used by FTC teams building autonomous routines.

- Contributed 12 merged pull requests across Quickstart code and documentation.
- Worked on tuners, auto-tuning, localization, coordinates, Bézier curves, constraints, and setup guidance.

EDUCATION · INSTRUCTION + ACHIEVEMENTREADING PROGRAM COMPLETER

Kumon

Worked as a Kumon instructor for two years while also completing the full Kumon Reading Program.

- Helped students work independently by explaining concepts, checking assignments, and giving focused feedback.
- Strengthened reading comprehension, vocabulary, analysis, and time-management through program completion.

EQUAL HORIZONS · ASSISTIVE TECHNOLOGYPRODUCT

Co-founder

Help research affordable assistive-technology ideas and turn them into early prototypes and product concepts.

02 Selected Projects

HARDWARE · FIRMWARE

Streaming Hackpad

A custom macro pad for streaming and media controls.

PCB · ELECTRONICS

Custom Dev Board

A custom PCB for electronics prototyping and testing.

HARDWARE · INPUT

Wireless Split Keyboard

A wireless split keyboard focused on comfort and portability.

WEB · FRONTEND

Pulse

A lightweight web interface for organizing fast-moving work.

Technical Toolkit

LANGUAGES

Java, Python, JavaScript, TypeScript

WEB

React, Next.js, Vite, Tailwind CSS

ROBOTICS

FTC SDK, Pedro Pathing, localization, telemetry

HARDWARE

PCB design, firmware, prototyping

TOOLS

GitHub, Supabase

Certificates

CS50x

Harvard University

Cybersecurity Fundamentals

IBM SkillsBuild

Remote Sensing

NASA ARSET

Earth Observations for Reservoir Management
