

Mithilessh Bhasker.

I build software that moves—from competition robots and autonomous pathing tools to custom hardware and accessible product ideas.

01

Experience

ROBO RACERS · FTC TEAM 16481

Software Lead

Lead autonomous software development for a competition robot, translating match strategy into repeatable field performance.

- Build and tune routes around scoring positions, obstacles, timing, and robot orientation.
- Use localization, pose, heading, path state, and telemetry to diagnose failures.
- Test and debug until autonomous behavior is reliable across repeated runs.

ROBOTICS

PEDRO PATHING · OPEN SOURCE

Contributor + Beta Tester

Improve the Quickstart and documentation FTC teams use to tune, localize, and build autonomous routines.

- Shipped four Quickstart changes involving two- and three-wheel tuners, auto-tuning, and configuration.
- Delivered eight documentation updates across localization, coordinates, Bézier curves, constraints, and setup.

EQUAL HORIZONS · ASSISTIVE TECHNOLOGY

Co-founder

Shape research, product direction, early prototypes, and communication around affordable, accessible technology.

PRODUCT

02

Selected Projects

HARDWARE · FIRMWARE Streaming Hackpad Macro controls for streaming and media workflows.	PCB · ELECTRONICS Custom Dev Board Board-level prototyping and system design.
HARDWARE · INPUT Wireless Split Keyboard Ergonomics and wireless interaction.	WEB · FRONTEND Pulse A clean interface for fast-moving teams.

Technical Toolkit

LANGUAGES

Java, Python, JavaScript, TypeScript

WEB

React, Next.js, Vite, Tailwind CSS

ROBOTICS

FTC SDK, Pedro Pathing, localization, telemetry

HARDWARE

PCB design, firmware, prototyping

TOOLS

GitHub, Supabase

FEATURED ACHIEVEMENT · PROGRAM COMPLETION

Finished the Full Kumon Reading Program

Completed the entire program through sustained independent study and long-term academic commitment.

- Strengthened reading comprehension, vocabulary, and written analysis.
- Developed consistency, time management, and independent learning habits.
- Progressed through increasingly advanced material to full completion.
