STUDENT DEVELOPER • FTC ROBOTICS SOFTWARE LEAD

Software Lead
FTC Robotics Team

12 Merged PRs
Open-Source Projects

FTC Robotics
Software Development

Open-Source Contributor
Robotics Tools & More

EDUCATION

 **Amador Valley High School**
 Pleasanton, California
 Expected Graduation: 2029

SKILLS

- Java
- Python
- HTML / CSS / JavaScript
- Git & GitHub
- KiCad
- Onshape
- FTC Robotics Software
- UI / Web Design

RECOGNITION

-  CRI
-  Western Edge
-  NorCal Regionals
-  Stang Hacks Winner

CERTIFICATES

-  GitHub Foundations
-  IBM SkillsBuild
-  Python (IBM / SkillsBuild)
-  Web Development (IBM)

EXPERIENCE / LEADERSHIP

- **RoboRacers — Software Lead** 2023 – Present
Lead software development for the FTC robotics team, support autonomous systems, testing, and team collaboration.
- **Pedro Pathing — Beta Tester / Open-Source Contributor** 2023 – Present
Contributed testing, feedback, documentation, and merged 12 pull requests for robotics pathing tools.
- **Kumon — Tutor / Assistant** 2022 – Present
Supported students in math and reading, helped explain concepts clearly, and built communication and mentoring skills.
- **Equal Horizons — Co-founder / Web Developer** 2023 – Present
Helped design and build a modern website focused on accessibility and impact.

PROJECTS

Jarvis Voice Assistant

Custom voice assistant with local processing, modular commands, and smart integrations.

OmniSight HUD

Real-time computer vision heads-up display for robotics with a clean, minimal interface.

Stream Deck PCB

Custom macro pad designed from scratch with KiCad, featuring programmable keys and a clean PCB layout.

Mycroft Mark II Dev Board

Hardware-focused development work inspired by production PCB systems.
