Pleasanton, California · Class of 2029

PROFILE

Student software developer with hands-on experience in FTC robotics, autonomous pathing, hardware prototyping, and web products. I build, test, document, and improve systems until they work reliably in the real world.

EXPERIENCE

SELECTED

Software Team · Robo Racers 16481

FTC Robotics

Develop and test FTC Java robot software, tune autonomous paths, analyze telemetry, and prepare reliable movement systems for competition.

Beta Tester & Contributor · Pedro Pathing

Open source robotics

12 merged pull requests across the official Quickstart and Docs, including two-wheel + IMU and three-wheel auto-tuners, tuner fixes, and setup/tuning documentation.

Co-Founder · Equal Horizons

Nonprofit leadership

Co-founded a student-led initiative exploring affordable, accessible assistive technology through research, product planning, and early prototyping.

Kumon Instructor

2 years

Support students in mathematics and reading, assess assignments, explain corrections, and help learners build accuracy, independence, and confidence.

SELECTED PROJECTS

2026

Streaming Hackpad

Custom RP2040 PCB with mechanical keys, rotary input, addressable LEDs, OLED, and a three-part printed enclosure.

Wireless Split Keyboard

60-key ergonomic keyboard designed in Fusion 360 and KiCad with CircuitPython and KMK firmware.

Pulse

Team command center for tasks, approvals, expenses, updates, meetings, and follow-ups.

EDUCATION

Amador Valley High School

Pleasanton, California

Class of 2029

SKILLS

CERTIFICATIONS & HONORS

Harvard CS50x

Introduction to Computer Science

IBM SkillsBuild

Cybersecurity Fundamentals

NASA ARSET

Fundamentals of Remote Sensing

FTC Think Award
